

URBAN DISTRICT COUNCIL OF  
CONNAH'S QUAY

ANNUAL REPORT OF THE MEDICAL OFFICER  
OF HEALTH AND PUBLIC HEALTH INSPECTOR.

For the Year Ended  
31st. December, 1966.

Public Health Department,  
Council Offices,  
Civic Centre,  
Connah's Quay.  
Deeside.  
Flintshire.

November, 1967.

To the Chairman and Members of  
THE URBAN DISTRICT COUNCIL OF CONNAH'S QUAY.

Lady and Gentlemen,

I have the honour to present to you my Annual Report on the health of the Urban District of Connah's Quay for the year 1966.

The estimated population for mid-year 1966 is 9,910 an increase of 520 on the figure for 1965. The birth and death rates are based on this estimated mid year population.

For estimating birth and death rates for comparison with rates from other Districts and the rates for England and Wales, a comparability factor is given by the Registrar General, allowance being made for the age and sex distribution in the District. This factor in 1966 being 0.92 for births and 1.55 for deaths.

The total number of births during 1966 was 207 giving an adjusted birth rate of 19.18 per 1,000 population, as compared with a rate of 21.1 in 1965 and with the birth rate of 17.7 for England and Wales for 1966.

The number of deaths during the year was 78 as compared with 75 in 1965, giving a death rate of 12.19 per 1,000 population as compared with a rate of 12.3 for the District in 1965 and a rate of 11.7 for England and Wales for the year under review.

There were 4 deaths of infants under 1 year of age during 1966, giving a rate of 19.32 per 1,000 live births, compared with a rate of 19.90 per 1,000 live births for England and Wales during the year, and a rate of 29.3 per 1,000 live births in this District during 1965.

There were again no deaths from Diphtheria or Polio, and it should again be stressed that immunisation against these diseases is still a "must" so that this record can continue.

Of the 78 deaths during the year 43 occurred from disease of the heart and circulatory system i.e., 55.1% of all deaths. Cancer accounted for 14 deaths i.e., 17.9% of all deaths. Bronchitis, Pneumonia and other respiratory diseases accounted for 6 deaths i.e., 7.6% of all deaths. So that these 3 main groups of disease, i.e., disease of the heart and circulatory system, cancer and respiratory infections accounted for 80% of the deaths.

There were no deaths from pulmonary tuberculosis.

There were 4 deaths due to cancer of the lungs and bronchus, and 10 deaths from other forms of cancer.

There was a decrease in the fresh cases of tuberculosis notified during the year - 4 in 1965, and 1 in the year under review, and during 1966, notifications were received of 38 cases of measles, 1 case of scarlet fever and 2 cases of influenza pneumonia.

The milk, ice-cream, water and swimming bath samples taken during the year were satisfactory.

In conclusion, I must thank all members of the Health Committee for their support, and in particular your Chairman Councillor Mr. Morley Thomas M.B.E., J.P. Your Clerk

Mr. L. Williams has been most helpful and friendly and I owe much to him and to Mr. C. Stoddard, Public Health Inspector, for the smooth running of the Health Department. Mr. F. Graham, Additional Public Health Inspector and Mrs. Jean Roberts, Clerk/Typist, have both been of great assistance to me during the year and I am grateful for their good work.

I am, Lady and Gentlemen,

Your Obedient Servant.

D.J. FRASER.

MEDICAL OFFICER OF HEALTH.

## SECTION A.

### STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

Area	4,218 acres.
Population	9,910.
Rateable Value	£1,721,674.
Product of Penny Rate.	£7,172.

### SOCIAL CONDITIONS.

The Urban District of Connah's Quay is on the South West Bank of the River Dee. The climate is temperate in all seasons, making the winter somewhat mild and giving the district a health aspect.

There is very little unemployment in the District.

### VITAL STATISTICS.

SECTION B.

GENERAL PROVISIONS OF HEALTH SERVICES IN THE AREA.

STAFF:-

Medical Officer of Health:-

Doctor D.J. Fraser,  
M.B., Ch. B., D.P.H.

Public Health Inspector:-

Mr. C. Stoddard M.A.P.H.I.

Additional  
Public Health Inspector:-

Mr. F.J. Graham M.A.P.H.I.

Clerk:-

Mrs. J. Roberts.

The Medical Officer of Health in addition to being Assistant County Medical Officer is Medical Officer of Health to the Borough of Flint, the Urban Districts of Connah's Quay, Mold and Buckley and the Rural Districts of Hawarden and Maelor.

The Public Health Inspectors Department is responsible for the supervision of refuse collection and disposal, work under the Public Health Acts, Housing Acts, Food and Drugs Act, Prevention of Damage by Pests Act, Pet Animals Act, Slaughter of Animals Acts, Clean Air Act, Factories Act, 1937 and the Offices Shops and Railway Premises Act, 1963.

#### LABORATORY FACILITIES:-

1. The Public Health Laboratory Service, Conway.
2. Royal Infirmary, Chester.
3. Public Health Laboratory Service, City Hospital, Chester.
4. Messrs. Ruddock and Sherratt, Public Analyst,  
Watergate Street, Chester.

#### NURSING IN THE HOME:-

The nursing of non-infectious sick is provided by the Flintshire County Council under the National Health Service Act, 1948. Home help is provided in the district.

#### CLINICS:-

The Flintshire County Council have opened a new Clinic at the Civic Centre, Wepre Drive, Connah's Quay and the following clinics are held:-

Maternity and Child Welfare	Weekly.
Dental clinic for children and expectant mothers	Weekly.
Speech Therapy	Weekly.
Handicraft class for physically handicapped adults	Weekly.
Paediatric Clinic	Monthly.
Antenatal Clinic	Weekly.
Blood Transfusion Service	Half Yearly.

The Mental Welfare Office for the Deeside Area and Home Visitor to handicapped persons on the staff of the County Medical Officer have offices in the building.

A voluntary staff attend the Maternity and Child Welfare Clinics to distribute baby foods.

#### HOSPITALS:-

1. The Liverpool Hospital Regional Board (which includes Chester).
2. Clwyd and Deeside Management Committee.

#### MEALS ON WHEELS:-

A meals on wheels service supplies hot meals to elderly people twice a week.

SECTION C.  
SANITARY CIRCUMSTANCES IN THE AREA.

The Central Flintshire Water Board is responsible for the water supply for the Urban District which is drawn from the Alwen Aquaduct, the local source having been abandoned.

During the year 25 samples of water from various parts of the district were submitted to the Public Health Laboratory Service by the Health Department for examination and were found to be satisfactory.

(1) DRAINAGE AND SEWERAGE.

MR. P. HAMPSON, THE COUNCIL'S ENGINEER AND SURVEYOR  
HAS GIVEN THE FOLLOWING NOTES DATED 5TH DECEMBER, 1967.

"The Council have received permission from the Welsh Office for the extensions to the Sewage Works. It is anticipated that tenders will be invited at the end of this year. The new works extension includes for a Paxman sludge drying plant to assist in the removal and treatment of sludge.

The pumping station, rising main and new sewer to serve the village of Northop Hall, has now been completed and the sewage from the parts of the village connected is now being treated at the Sewage Works.

In spite of the increase in residential development throughout the district and the consequential overloading of the sewage works a satisfactory effluent is being maintained."

(2) RIVERS AND STREAMS.

There are two streams flowing into the river and since the opening of the new sewage works during 1965 there has been a marked decrease in the pollution of the banks of these streams.

(3) PUBLIC CLEANSING.

Public cleansing is carried out satisfactorily.

(4) REFUSE COLLECTION AND DISPOSAL.

A weekly collection of household refuse was maintained during the year, and facilities are provided for the collection and disposal of other refuse at the request of the householder.

The tip situated in the centre was completed during the year and the completed site will be used as an open space by the Council.

The new tip was opened in a sand pit used by the Council, and in the initial stages difficulty was experienced in controlling the tip as the Ferguson Tractor was inadequate to dig out the covering material. The Council agreed to obtain a larger machine and an order was placed for the delivery of such equipment during 1967.

Regular insect and rodent control measures are taken and there is no evidence of any major infestation.

(5) SMOKE ABATEMENT.

The Council have considered the question of extensions to the existing area and it is hoped that it will be possible to commence work on this during the next year and to include all new development.

The existing area has created no major problems during the year under review, nor were there any complaints regarding industrial users.

Complaints, however, were received regarding dust from the manufacture of concrete blocks. This matter is the subject of an enquiry under the Planning Acts, regarding an appeal made by the occupiers of the site.

(6) SWIMMING BATH AND POOLS.

MR. W.H. CAMPS, THE MANAGER OF THE COUNCIL'S SWIMMING BATH AND ASSEMBLY HALL HAS SUPPLIED THE FOLLOWING INFORMATION ON THE SWIMMING BATH: - - - - -

"The Swimming Bath was opened on the 12th August, 1961. It lies on the South side of the Civic Centre. The size of the pool is 110 ft. long and 42 ft. wide, this length allows for National Events to be held there. It is 3 ft. deep at the shallow end and 11 ft 6 ins. at the deep end.

The whole of the bath surround is tiled with non-slip tiles, and the pool is tiled with blue tiles, this gives a very pleasant effect upon the water.

The bath is provided with a 1 metre and a 3 metre spring board, also a 3 metre firm board, so diving competitions can take place.

Alongside the bath are the changing rooms, and clothing storage rooms, shower baths, and foot baths and toilets are conveniently placed for the use of the bathers.

The pool holds 188,000 gallons of water, every 4 hours this water goes through a filtration and sterilisation process, it is drawn from pumps from the deep end of the pool, it then goes through strainers, and then on to the sand pressure filters. After filtrations, it is re-heated and chlorine is then injected into it to sterilise it.

The chlerine is used not only as a sterilising agent, although that is its main function, but also as an active strong oxidising agent performing many other useful functions in the process of water treatment.

The water is then returned to the pool at the shallow end of the bath.

The bath staff take tests every 3 hours to ensure that

the water is kept at the very high standard laid down by the Ministry of Health. The Public Health Inspector also takes samples from the pool at various times, these are sent to a laboratory where the water is put through a much stricter test than can be carried out at the baths, reports of these samples are sent to the Medical Officer of Health and the Public Health Inspector and myself.

The heat for the bath is produced by two oil burning boilers and is thermatically controlled. These boilers also supply the hot water for the showers and wash hand basins etc."

The following number of people attended the bath in 1966:-

Adults	...	65,771
Juniors	...	112,197
Spectators	...	29,777

Swimming Lessons	4,515
Season Tickets Sold	15

Schools.

Flintshire Schools	27,222
Private Schools	Nil.

During the year 127 samples of water were taken from the bath for bacteriological examination and found to be satisfactory.

(7) ATMOSPHERIC POLLUTION.

At the end of 1959 two stations were equipped for the measurement of atmospheric pollution at Bryn Deva School and Wepre Hall Gardens.

The monthly reading during 1966 compared with 1965 were as follows:-

(a) MEASUREMENT OF SULPHUR DIOXIDE WITH LEAD PEROXIDE APPARATUS.

MONTH	BRYN DEVA SCHOOL		WEPRE HALL GARDENS	
	1965	1966	1965	1966

SECTION D.

PREVALENCE OF AND CONTROL OVER INFECTIOUS  
AND OTHER DISEASES GENERALLY.

---

---

NOTIFICATIONS DURING  
1966.

---

---

INFECTIOUS DISEASES:-

Measles	.....	38
Influenzal Pneumonia	.....	2
Scarlet Fever.	.....	1

TUBERCULOSIS (NEW CASES NOTIFIED).

Pulmonary	.....	1
Non-Pulmonary	.....	0

SECTION E.

FOOD SUPERVISION.

(1) NUMBER OF FOOD PREMISES IN THE AREA:-

Butchers	...	9
Licensed Premises	...	16
Cafes, Restaurants etc	...	4
Canteens & School Kitchens	...	6
Fish Friers	...	5
Fishmongers	...	-
Greengrocers & Fishmongers	...	2
Greengrocers	...	9
Grocers	...	23
Bakehouses	...	1
General	...	11
Manufacture of Cooked Meats and Sausages	...	4
Wholesale Meat Supply	...	-
Supermarkets	...	3

(2) NUMBER OF PREMISES REGISTERED UNDER SECTION 16 OF THE  
FOOD AND DRUGS ACT, 1955.

1.	For the manufacture, storage and sale of ice-cream (complete cold mix).	=	-
2.	For the storage and sale of ice-cream.	=	25
3.	For the manufacture of cooked meats and sausages.	=	4

(3) NUMBER OF INSPECTIONS OF REGISTERED FOOD PREMISES.

1.	Ice-cream premises.	=	20
2.	Manufacture of cooked meats and sausages.	=	51

(4) EDUCATIONAL ACTIVITIES.

Publicity material was distributed to various food premises and schools.

(5) METHOD AND DISPOSAL OF CONDEMNED FOOD.

- (a) Tinned goods etc., are buried in the Council's refuse tip after all containers have been opened.
- (b) Meat and offal condemned at the slaughterhouse in the District is dyed and the owners are permitted to dispose of it to an animal by-product firm in the neighbouring District, and to a mink farm.

(6) SPECIAL EXAMINATIONS.

No special examinations were made of any stock or consignment of food.

(7) ICE CREAM HEAT TREATMENT REGULATIONS.

Samples were taken from retailers registered for the storage and sale of ice-cream and were reported on as follows:-

ICE CREAM SAMPLES.

Grade 1	...	5
Grade 2	...	1
Grade 3	...	-
Grade 4	...	-

All registered retailers sell pre-packed ice-cream. A number of retailers from outside the area visit the District in the evenings and at weekends selling loose ice-cream, mainly in vehicles fitted for the manufacture and sale of soft ice-cream.

The standard of hygiene in these vehicles is satisfactory.

(8) MILK SUPPLIES - BRUCELLA ABORTUS.

(a) Number of samples of raw milk examined	=	37
(b) Number of positive samples found	=	-
(c) Action taken in respect of positive samples	=	-

(9) THE LIQUID EGG (PASTEURISATION) REGULATIONS 1963.

There are no egg pasteurisation plants in the District.

(10) FOOD HYGIENE (GENERAL) REGULATIONS 1960.

- |     |   |   |    |
|-----|---|---|----|
| (a) | Number of premises complying with Regulation 16         | = | 87 |
| (b) | Number of premises to which Regulation 19 applies       | = | 71 |
| (c) | Number of premises fitted to comply with Regulation 19. | = | 71 |

No serious breach of the Regulations were found during the year, but the difficulties caused by frequent changes of staff were still met and the failure to use facilities provided.

(11) POULTRY INSPECTION.

There are no poultry processing premises in the District.

(12) MEAT INSPECTION.

There are 2 licensed slaughterhouses in the District, of which one is a small slaughterhouse handling the requirements of the Occupier, while the other slaughterhouse is operated by a Wholesale Supply Company, which supplies meat in the Deeside Area and part of Cheshire. The latter slaughterhouse ceased operation in August 1966 and no application has been received for renewal of the licence.

Most of the slaughtering is carried out in the late afternoon and evenings on Monday's, Tuesday's and Wednesday's and Sunday mornings and afternoons. To carry out an efficient inspection of this meat it has been necessary for the inspection to be made outside normal hours and 185 hours overtime were worked during the year.

CARCASES AND OFFAL INSPECTED AND CONDEMNED IN WHOLE OR IN PART.

	Cattle Ex <u>Cows.</u>	<u>Cows.</u>	<u>Calves.</u>	Sheep and <u>Lambs.</u>	<u>Pigs.</u>	<u>Horses.</u>
Number Killed:	692	-	2	5,169	1,007	-
Number Inspected:	692	-	2	5,169	1,007	-

ALL DISEASES EXCEPT TUBERCULOSIS AND CYSTICERCII:

Whole carcase condemned:	-	-	1	-	-	-
Carcase of which some part or organ was condemned:	98	-	-	78	33	-
Percentage of the number inspected affected with disease other than tuberculosis and cysticerci:	14.2	-	50.0	1.5	3.3	-

Carcases and Offal inspected and condemned in whole or  
in part /Continued.....
